### CEDAR MODEL PIANO

This model piano was made around 1870, probably for a child to practice on. It is only a keyboard, the keys move but there are no hammers or strings. It was built by Zachariah Skyring, an early pioneer of the area.

The piano is 1120mm long by 730mm high. (44 x 28 inches) and appears to be made from an occasional table.

It was donated by Zachariah's grand-daughter, Mrs S Woolgar, and it is on display in the tank.
