

## FASCINATING FIND

### DIMETRODON

**This life size dimetrodon was created years ago by One Mile State School students for use in a Gold Rush parade.**

**Over 3 metres long and 1.8 m high, it roamed the planet during the Permian period (270 million years ago), around the time when Gympie's gold was injected and 40 million years before the dinosaurs.**

**It hides in a corner of the stamper shed.**
